

# IHC ROBBINS

## HEAVY MINERAL SPECIALISTS

IHC Robbins blends the heavy mineral heritage of R.J. Robbins / Robbins Technology Group, with the global strength of Royal IHC.

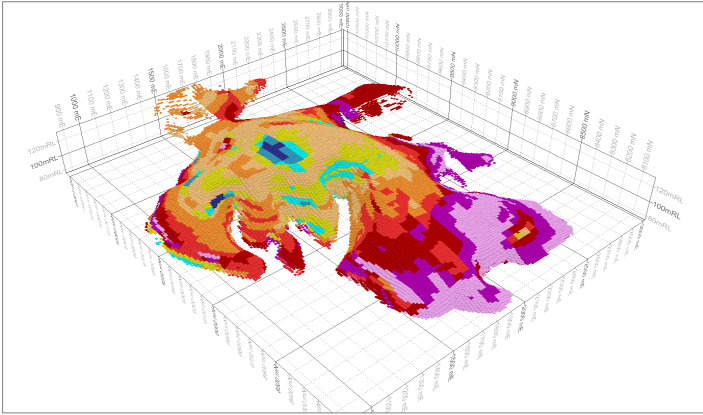

The company has a proven track record in delivering geo-metallurgical, engineering and equipment solutions through to fully integrated mining & mineral processing plants.

IHC Robbins is well positioned to deliver standard hardware through to complex multi-disciplinary project builds.

Fixed cost turnkey delivery, meeting a clients' time, cost and quality targets, underpins the IHC Robbins philosophy and reputation.

Financing and lease arrangements for selected clients, differentiates IHC Robbins as a technical and commercial leader in a cost-competitive market.

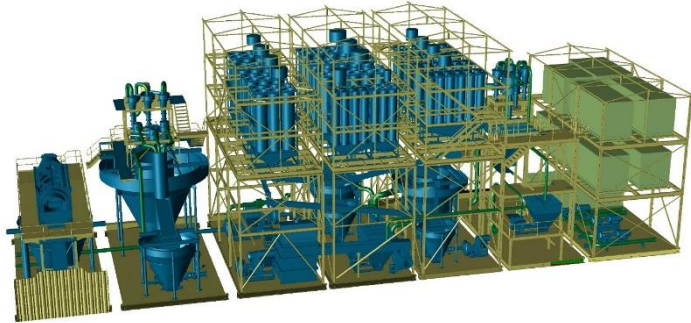

## RESOURCE

IHC Robbins provides professional and highly experienced mineral sands geological services. IHC Robbins draw upon a breadth of experience gained working with the worlds largest mineral sands companies for over 20 years.

## METALLURGY

IHC Robbins offer fully independent metallurgical services specific to the needs and requirements of clients. IHC Robbins operates a fully equipped physical characterisation laboratory for mineral ores derived from drilling and test pit bulk sampling programs.

## ENGINEERING

IHC Robbins provide innovative, practical and cost effective services to its clients through multidiscipline engineering design, supply and construction management. IHC Robbins offer complete project solutions, from conceptual studies through to plant construction and commissioning.

## EQUIPMENT

IHC Robbins equipment is of the highest quality and performance resulting from years of operating knowledge and experience. IHC Robbins equipment solutions are designed to satisfy both the technical and commercial needs of customers operating in the minerals processing industry.
