

ROBBINS

HAL Reactors

IHC Robbins (IHCR) has supplied commercial scale Hot Acid Leaching (HAL) Reactors with retention times of 2 hours+.

Our Reactors are a quality installation and come supplied with guaranteed refractory lining systems, forged tyres / trunnion sets and a custom fiberglass discharge assembly.

Our tyre and trunnion assemblies are machined to ensure excellent concentricity and subsequent longevity of the running gear. This equates to lower operating costs for our clients.

IHCR reactors can be supplied with either electric or hydraulic drives. IHCR can also supply Sulphuric Acid and Caustic dosing systems matched to the HAL unit as required and in addition Installation and civil plinth design.

For a quotation or further information please give us a call and we will be pleased to assist with your processing needs.
